***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claims 25-46 drawn to a process purification/isolation wherein diastereo-selective reduction is a chemical process

II. Claims 25-46 drawn to a process purification/isolation wherein diastereo-selective reduction is an enzymatic process.

The inventions do not match a permitted category as PCT Rule 13.2 does not provide for multiple methods or products in one category. The methods claimed do not share a common component and are not technically closely interrelated. The claims are directed to processes which are distinct since they use, for example, a microorganism or a chemical catalyst

Accordingly, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.

For these reasons restriction for examination purposes is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
